SECURITY ADVANCED

SECURITY IN AN UNCERTAIN WORLD

Last year saw a record-setting number of cybersecurity incidents. Hackers are getting more persistent, more organized, and more successful. And every business is a target, regardless of size.

So, what can you do to protect your business investments?

Add JMARK's **Security Advanced** arsenal to your IT strategy. This multi-layered approach utilizes cybersecurity best practices and best-in-class products to proactively identify threats and respond immediately. And as the types of threats change, so does **Security Advanced**. It will evolve as new criminal tactics and threats arise, giving your business the most robust protection possible when the bad guys come knocking.

1 300%
According to the FBI, this was the increase in cybercrimes in 2020.

2 2,244
The number of times hackers attack each day.

3 280 DAYS
The average lifecycle of a breach, from identification to containment.

4 $2.6 MILLION
The average cost of a cyberattack.

ADDRESSING TOMORROW'S THREATS TODAY

Cybercrime doesn't sleep and neither does **Security Advanced**. We created this comprehensive and vigilant suite of best-in-class tools that constantly evolve. With versioning, each aspect of your security is consistently updated to ensure the continuous safety of your network.

The interconnected components in **Security Advanced** work together to intercept and impede the relentless barrage of attacks that hit your network each day. Featuring:

- Security logging
- Threat management
- Executive threat reporting
- End-user training
- Endpoint defense
- Web filtering
- Cloud app security
- Spam filtering
- Threat intelligence
- Off-network endpoint security
- 24/7 security operation center monitoring

CIS TOP 20

This solution is designed to align with the rigorous standards set by the Center for Internet Security. The CIS Top 20 outlines the top security controls that any organization should have, as recommended by the world's leading cybersecurity experts.

The ⚛ JMARK Difference
